

Message from Director of the Administrative Office

The Center has successfully conducted four co-sponsored regular sessions and two trainings fully supported by the ROC Ministry of Foreign Affairs in 2016. There were 156 participants from 61 different countries in total. Most participants considered the investment of time and energy in the training worthwhile and fruitful. They also expressed heartfelt gratitude that the ROC government and the Center granted them this opportunity for attending the high quality professional training, as well as for knowing Taiwan as such a beautiful and friendly country.

Aside from training, the Center also made every effort to maintain and renovate the facilities and hardware, so as to provide even more convenient and comfortable learning and living environment. With limited budget this year, the renovation works have been completed, including some of the classrooms, participants' dining room, entrance of administration building and some public areas. This has greatly improved the overall training quality and the modernized image of the Center.

I hereby express my thanks to the faculty from USA, Brazil, Germany, China and Taiwan. Without their generous sharing of expertise, the training could not be successful. I am also proud to work with the Center's compact team of only nine staff members. They all had abundant experiences and worked very hard to help every participant make the most benefits out of the training. I truly look forward to seeing the greater future of the Center.

Clemens Fang-cheng CHUNG
